ROYAPETTEAH, CHENNAI

OBJECTIVE

Versatile full-stack developer with strong experience in building dynamic web applications using Python, Flask, HTML, CSS, and JavaScript.
Skilled in designing responsive frontends and integrating robust backend logic with database connectivity.
Proficient in developing scalable solutions with clean code and efficient architecture.
Passionate about solving real-world problems and continuously learning emerging technologies.

EDUCATION

- **COLLEGE :** Justice Basheer Ahmed Syed college for women, Bachelor of Computer Application.
Passed out : 2025
 - **HSC:**st.ursulas anglo India hr sec school, Church park
 - **POST GRADUATE:** Currently Perusing MCA at Measi Institute of Information Technology.
-

INTERNSHIP

PYTHON APP DEVELOPMENT IN ALFIDO TECH :

I had completed an Internship at ALFIDO TECH in that I had completed an intern at from (20 JAN 2025 to 20 FEB 2025) The hands on experience gained during the training and internship had provided a solid foundation in python Development.

APPLICATION DEVELOPEMENT IN TECHNO HACKS :

I had completed an Internship at TECHNO HACKS in that I had completed an intern at from (08-01-2025 to 07-02-2025) The hands on experience gained during the training and internship had provided a solid foundation in Application Development.

FLUTTER APP DEVELOPEMENT AT IIT MADRAS :

I had completed an Internship which was conducted by TECHNO BYTES and Mechanica'24, MEA IIT Madras in that I had completed an intern at from (26-12-2024 to 30-12-2024) The hands on experience gained during the training and internship had provided a solid foundation in ANDROID APP DEVELOPEMENT with FLUTTER APP.

DATA ANALYTICS IN ALFIDO TECH :

I had completed my Data Analytics course in ALFIDO TECH In that I had analyze there given task and visualize them using the tools like Power-Bi, Excel and Tableau. The hands on experience gained during the training and internship had provided a solid foundation in Data Analyzation.

WORKSHOP AND BOOT CAMP

WORK SHOP AT IIT MADRAS :

I had attended 40 Hours Bootcamp/Internship program 2024 organized by TECHNO BYTES and Mechanica'24, MEA IIT Madras Technologies for the ANDROID APP DEVELOPEMENT and we also use to develop our Android app in Flutter Apps in the Platform of Android Studios in collaboration with Mechanica'24 MEA IIT Madras.

WORK SHOP ATTENDED AT IIT MADRAS :

I had attended work shop at IIT Madras on (26th and 27th October 2024) which was collaborated with TECHNO BYTES and Mechanica'24, MEA IIT Madras. in the stream of Generative AI.

COURSE COMPLETION

Full Stack Development in Python :

I had done my Full Stack Development in Python Programming course in the BESANT TECHNOLOGIES Institution. In this course I had completed MYSQL, Python Programming, Front end development with HTML, CSS AND JAVA SCRIPT and also with the Frame work of REACT. And Developed some of the projects as an Application and Websites.

PYTHON PROGRAMMING LANGUAGE :

I had completed my Python Programming Course at Cse Computer Education Certification By Govt Of India. In that Institution i had learn The Advance Python Development.

CERTIFICATIONS

OFFLINE CERTIFICATIONS

- Full Stack Development in Python
- Python Programming Language
- AI-Tools and Automation
- Prompt Engineering
- Generative AI

INTERN/BOOTCAMP CERTIFICATES

- Data Analytics
 - Application Development
 - Java Development
 - Python Programming
-

PROJECT COMPLETED

• AI Interview System with Intelligent AI Agent

Developed a deep learning-based medical diagnosis system to predict Alzheimer's disease using Convolutional Neural Networks (CNN) for image classification and pattern recognition. The system analyzes medical imaging data, performs automated feature extraction, and generates predictive results through an interactive web interface with secure data handling.

Technologies: Python, TensorFlow/Keras (CNN)-Convolutional Neural Networks

• PROJECT USING PY-CODE AI SAMPLE BACKOFF

Developed a Python-based AI model aimed at enhancing the reliability and interaction within educational environments. The system was designed to communicate with users, understand queries, and provide intelligent responses to promote knowledge sharing and learning support.

• DISASTER DETECTION SYSTEM ML MODEL

Designed and developed an AI-based disaster detection system that predicts potential natural disasters using Machine Learning algorithms and real-time data analysis. The system processes input parameters, performs predictive modeling, and generates risk assessment outputs through a responsive web interface.

Technologies: Python (Flask), Scikit-learn Using Convolutional Neural Networks-CNN

• AI Interview System with Intelligent AI Agent

Developed an AI-powered web application that conducts automated interview sessions through an intelligent AI agent capable of interacting with users and asking dynamic interview questions. Integrated Machine Learning-based response analysis, performance scoring, and structured feedback generation with secure user authentication. Using : Artificial Neural Network-ANN

• PERSONAL VOICE ASSISTANT

Developed a browser-based virtual assistant inspired by Iron Man's Jarvis, capable of recognizing and responding to voice commands in real-time. The assistant integrates speech recognition with dynamic user feedback through an interactive and responsive UI.
